

Safety Manager – Field Position – Akron, Ohio

Welty Building Company is seeking to fill key field positions based out of our Akron, Ohio office. The Safety Manager is the on-site individual responsible for the implementation of the Safety Plan, Positive Safety Outcomes, and Implementation of OCIP activities on the construction site.

Welty provides professional construction management services, specializing in Lean Construction for clients in a variety of energy, healthcare, commercial, education, and hospitality markets nationwide. With offices in Akron, Cleveland and Columbus, Ohio, and Houston, Texas. Welty has been Enriching Lives through Great Construction and Building projects since 1945. Welty has the distinction of creating some of the most prestigious community projects including the world-renowned Goodyear Tire & Rubber Company's new Global Headquarters, major renovations of the Pro Football of Fame, the FirstEnergy Transmission Control Center and is currently working on several Electric Utility Transmission and Distribution Projects in addition to many others.

At Welty Building Company, we live our terminal values of **Family, Safety, Communications, Diplomacy, Prosperity and Personal Growth**. We bring a creative energy to our projects where every individual is an essential part of the team. The work we do is collaborative, with an entrepreneurial spirit, and opportunity for growth and improvement. With our cutting edge approach, we expand the boundaries of the way things have always been done in favor of innovation, and exceeding our client's expectations. Welty does much more than construct and build great projects and buildings, we build relationships – with our clients, employees and the communities they serve.

Responsibilities include, but are not limited to:

- Develop, distribute, and implement the Project Site Specific Safety Plan
- Manage and coordinate the overall Project Site Safety Program delivery process
- Identification of the initial on-site or off-site initial treatment facility for immediate control of claim, maintain communication with this location
- Implement Site Safety Orientation program for all new trades coming on site
- Field presence - walking the site to look for safety issues vs. production / schedule
- Maintain positive relationship with field personnel surrounding safety

- Maintain relationships with all Trade Safety personnel, engage them regularly
- Receive and consolidate safety performance reporting
- Monitor safety performance and reporting for the project
- Monitor / analyze accident information and safety performance statistics for action
- Supervise safety program administration and audit the safety management process
- Monitor safety training and certification program, verifying certification for certain specialties, and conducting periodic training where qualified
- Monitor Return-To-Work program and support claims management process
- Enforce safety rules and ensure subcontractors are holding their safety meetings and toolbox talks
- Promote and facilitate Safety Task Analysis process
- Promote and facilitate Job Hazard Analysis process
- Develop Emergency Evacuation Plan, ensure broad communication, and conduct drills

Qualifications:

- 3-5 years experience in Construction Field Safety
- OSHA 30-hour certification required
- First Aid / CPR certification required
- Excellent written and verbal communication skills
- General competency utilizing Microsoft Suite and general computer applications a must
- College degree in related field is preferred
- First Aid / CPR training experience preferred
- Additional specialty safety certifications preferred

Welty offers competitive compensation and benefits package.
