Bradley Ewing Announced as President and Chief Operating Officer of Welty Energy Business

Experienced Executive in Construction Management of Energy Projects

February 20, 2018 – Akron, OH – Welty Building Company, proven partners in comprehensive building services and construction management, named Bradley Ewing as President and Chief Operating Officer of Welty Energy Business. In his new role as President and COO, Ewing will have financial oversight and responsibility for growth, operations, and project management of electric utility projects. He will lead a business unit transformation driven by Lean Building Science™.

Bradley comes to Welty from NG Gilbert, where he served as Executive Vice President and Chief Operating Officer. He brings over 30 years of energy experience, primarily at First Energy where he served as Vice President – Energy Delivery. He has proven himself a leader in cultivating customer and employee satisfaction and fulfillment, building high performance teams, and creating a continuous improvement culture.

"We are very pleased to have Brad on the team," said Donzell Taylor, President and CEO of Welty Building Company. "He will be instrumental in managing the rapid growth of the energy business, and I know his skillset will prove invaluable to the future of Welty."

“I am very excited to join the Welty team,” said Bradley Ewing. “We have an attractive product offering that will help customers to lower project costs, shorten timeframes and identify continuous improvement opportunities that will yield both immediate and future benefits. With significant capital spending planned in the U.S. on electric infrastructure, Welty’s product offering is critically needed to get the most efficient use of these dollars, and Welty’s ‘Lean’ approach to project management delivers results.”

About Welty Energy

Welty Energy works with investor-owned utilities while partnering with industry leaders to efficiently and safely manage the construction of transmission and substation projects in the Eastern United States. Welty continues to work with large, regulated utility companies to manage the delivery of energy transmission, control centers and substations with proven results. With offices in Akron, Cleveland and Columbus, Ohio and Houston, Texas, Welty delivers the most extraordinary building experience by never being afraid to do what’s right – since 1945. In addition to Welty’s work in energy, Welty has had the distinction of creating many prestigious community assets, including the world-renowned Goodyear® Tire & Rubber Company’s new Global Headquarters, a multi-phased expansion to the Pro Football Hall of Fame, Kay Jewelers Pavilion at Akron Children’s Hospital, the City of Akron’s Ohio Canal Interceptor Tunnel, plus numerous academic buildings at The University of Akron.
